unobtrusive in use

Easy installation: Plug-and-play via USB-A enables quick setup without additional installation effort

The InLine® USB Fingerprint Scanner offers a convenient way to log in to Windows systems. Thanks to Windows Hello support, the fingerprint is used as a secure key for access. This reduces the need to enter passwords and simplifies daily workflows. The fast recognition time of 0.5 seconds ensures immediate access without delays. At the same time, the ability to store up to 10 fingerprint profiles allows for flexible use at shared workstations. Thanks to its compact design, the scanner can be discreetly integrated into existing work environments. It connects via USB-A, enabling direct use without any additional installation effort. This makes the device suitable for use on various systems running Windows 10 or 11.

USB version: USB 2.0

Sensor size: 10 x 8 mm

Fingerprint profiles: max. 10 can be stored

Recognition time: 0.5 seconds

Dimensions: 21 x 18 x 12 mm

Weight: approx. 3 g

System requirements: Windows 10, Windows 11, USB-A connection
