Model: 4192C001

Manufacturer: CANON

EAN: 4549292158656

Product Code: 467501

# R1,131

Bring your images to life with professional ink for detailed and reliable results every time. This new and improved ink has higher black density than previous Matte Black inks and has been specifically introduced for the imagePROGRAF PRO-300. This pigment-based ink system delivers intense black colour and promises to set your prints apart from the rest thanks to outstanding photo permanence. Enhanced black density, coupled with wider dark area reproduction range and improved gradation appearance, means this Matte Black ink offers many expressive possibilities, especially when printing on fine art paper. Print up to 1750 photos on 4x6" photo paper<sup>1</sup> or 270 photos on A3<sup>2</sup>.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
