

DELL 461-10169 cable lock Black

Model: 461-10169

Manufacturer: DELL

EAN: 5028252300285

Product Code: 468107

R2,754

Overview

The Kensington ClickSafe™ lock is designed for effortless protection of computers and your most important data. It attaches to hardware in a single step. Just one click and it's safe. There's no need to insert a key or follow multiple steps to lock your hardware. ClickSafe combines a cable made from superior materials with a tamper-proof disc-style lock to deliver the strongest security available in a cable lock.

SIMPLER : ONE 'CLICK' AND YOU'RE SAFE

The Kensington ClickSafe lock is designed to be the strongest and easiest-to-use lock available without compromising security. A keyless locking motion makes the employees' role in protecting your business easy. All they have to do is 'click' it on and your business is protected.

SAFER : CLICK' IT TO KEEP IT

Kensington ClickSafe locks are constructed from the strongest materials to deliver the best security available from a cable laptop lock. A high carbon steel cable, all metal lockhead and rigorous real-world testing against lock-picking, corrosion, tampering and for a lifetime in excess of 10,000 key turns means that you can rest assured that ease of use is delivered without jeopardizing integral

strength.

SMARTER: 'CLICK' TOGETHER - SAFE TOGETHER

A physical lock is an investment that pays back every time it's used. Designed to fit busy daily routines, ClickSafe's superior strength and ease of use makes your first line of defense even stronger. ClickSafe locks have been designed to protect your business, they've been designed to be used.

Strong high-carbon steel cable

The lock boasts the strongest physical security currently on the market with a thick high-carbon steel cable and all-metal lockhead. The ClickSafe has undergone rigorous real-world testing against corrosion and tampering and is designed to last in excess of 10,000 key turns.

Pivoting lockhead for flexible installation

The lock protects office technology by attaching to a Kensington security anchor installed in the Kensington security slot found in 99 per cent of laptops. For flexibility and convenience, the lockhead pivots 180 degrees and rotates a full 360 degrees around the cable.

Improve office security

Simplify office technology security with the Kensington ClickSafe Lock, which combines a cable and a tamperproof, disc-style lock. Because ClickSafe locks attach to hardware in a single step, employee compliance will increase. This lock comes with two keys.

Protect hardware and data

Whether you're a small business owner, an office manager or an IT worker, you need to protect your electronic assets. Kensington locks, such as the ClickSafe, protect more than just your hardware-- they safeguard your business and personal data.

Simple and secure

The ClickSafe is easy to use and provides a high level of security against equipment and data theft. It locks with a simple click--no keys, codes or complicated manoeuvres are required.
