

InLine woodbrick, Induction speaker in real wooden case

Model: 55381H

Manufacturer: INLINE

EAN: 4043718218097

Product Code: 469448

R1,216

Music playback via induction without wireless technology:The speaker picks up audio signals directly via the induction surface and plays them back without Bluetooth or Wi-Fi. Ideal for environments without a pairing process.

High-quality real wood housing with a material thickness of 5 millimetres:The sturdy wooden housing ensures an attractive appearance and emphasises the design character within the woodline product series.

Compact format with integrated rechargeable battery:With dimensions of 120x70x40mm and 6-8 hours of playback time, the loudspeaker is suitable for flexible applications.

Alternative wired use possible:The audio signal can also be transmitted via cable using the integrated micro USB port. The appropriate USB A to micro USB cable is included in the scope of delivery.

Efficient 3W audio performance in mini format:The integrated 32 mm speaker with 4 ohm

impedance delivers balanced sound reproduction in the frequency range from 300 Hz to 15 kHz.

The InLine® woodbrick induction speaker combines modern induction technology with a high-quality real wood housing. Audio signals are captured directly via the induction surface of the speaker, amplified and reproduced via the integrated 32 mm speaker. A Bluetooth or Wi-Fi connection is not required.

This technology enables instant music playback without pairing or network configuration. The device is suitable for environments where wireless connections are deliberately avoided or a simple plug-and-play solution is desired.

The integrated 800mAh Li-ion battery provides 6-8 hours of playback time. The charging time is approximately 3 hours at an input voltage of +5V. Charging is via the integrated micro USB port. A USB A to micro USB cable is included in the scope of delivery.

32 mm speaker, 3 W

Frequency: 300 Hz–15 kHz

Impedance: 4 ohms

Li-ion battery: 800 mAh

Input voltage: +5V

Playback time: 6-8 hours

Charging time: approx. 3 hours

Micro USB port for charging

Real wood housing, 5 mm thick

Dimensions: 120 x 70 x 40 mm

Weight: 150 g

Includes micro USB cable USB A plug to micro USB plug
