structured storage of small devices and accessories in the workplace. With its compact dimensions of 120x60x34 mm, it offers a space-saving way to store smartphones, USB power supplies, power banks, or small measuring devices in an orderly manner. The different compartment widths – from 30 mm to 10 mm – allow flexible use depending on the size of the device.

The non-slip rubber feet ensure a stable stand on various surfaces such as desks, shelves, or workbenches. This makes the Multi-Stand ideal for use in IT departments, service centers, workshops, or everyday office life. Even in confined spaces, it can be flexibly integrated and contributes to the optimization of work processes.

The simple, functional design blends into any work environment without distracting from the essentials. The solid workmanship ensures a long service life - even with daily use.

The InLine® Multi-Stand is therefore an effective solution for creating ergonomic and organized workplaces.
