

InLine 4x4 Multi-View HDMI Matrix Switch 4 IN 4 OUT Video Wall FullHD

Model: 57830I

Manufacturer: INLINE

EAN: 4043718233120

Product Code: 469579

R19,704

The InLine 4x4 multi-view distributed HDMI Matrix 4 HDMI Inputs 4 HDMI outputs individually, while the mapping between the video source and the display on the display is very individually adjustable, it can be shown with any source on a 2x2 video wall. The six displayable modes are: Matrix, PIP (Picture in Picture) PAP (Picture in Picture) Quad View, Windows mode and video wall. In matrix mode, 1-4 sources can be printed on 1-4 displays. PIP forms a source as a small picture from within another source. The Windows mode shows all 4 sources in window style simultaneously on the display. The Quad View mode shows the 4 sources in windows side by side on all four displays. The PAP provides a source of great on a display, the other 3 sources besides small. The video wall stretches the mode signal from a source 4 mounted on the display as a video wall (2x2) is thus a representation of 1920x1080 to 3840x2160 inserted possible. The operation of the matrix switch can be operated via the buttons on the front panel, via an IR remote control, a mouse / keyboard (via USB) or via RS-232. The switch has 19 "format and can be comfortably accommodated with the
