Maximise efficiency in your hybrid working environment

The digital transformation of your working environment is at your fingertips. Save time with web scanning from a wide range of devices and the CaptureOnTouch Lite Web browser-based application. Organise your document batches using the intuitive CaptureOnTouch Pro Canon scanner software.

Make sharing easy for everyone

Ideal for offices and shared spaces, this scanner provides flexible connectivity and helps to improve collaboration. The powerful direct scanning function allows you to select the most convenient destination for your workflow and save documents in multiple formats. Simply choose whether to use your smartphone, tablet, computer or the scanner device. Quickly scan images directly to Teams & Slack group chats or select whether to send your documents to email, shared folders, FTP and more.

Experience greater flexibility

Use the USB cable to connect your personal device or enjoy the simplicity of having this network scanner by using the LAN. Scan from any location thanks to browser scanning and save documents on your smartphone by capturing the QR code that will appear on the device when you want.

Enhance quality and productivity

Experience a fast scanning speed of 50ppm, create and save editable and searchable documents with the optical character recognition. Produce high quality output with the colour enhancement feature and achieve high quality results of photo and readability of text using the 'document with photo' scan mode.

Improve sustainability

Support the environment by using this highly-durable, EPEAT Gold certified device with low power consumption, packed with reusable materials and built with high level of recycled plastics.
