

InLine HDMI Audio Extractor, input 4K2K HDMI

Model: 65007K

Manufacturer: INLINE

EAN: 4043718231171

Product Code: 471061

R1,671

With the HDMI audio extractor you can extract the original HDMI audio signal and convert it into digital optical or analog multi-channel audio signals. This allows you to output the audio signal to external speakers or extend the path of the audio signal. The extractor is used e.g. when the image display does not support sound. When connected to a 4K2K display at the same time, the video is displayed without downgrading the resolution.

Note:When displaying an HDMI 4K2K signal, an equivalent source signal, output display and HDMI cables are required to ensure the best image display.
