

InLine RJ45 female insert SNAP-In Cat.5e

Model: 74206L

Manufacturer: INLINE

EAN: 4043718055715

Product Code: 472483

R820

Flexible integration into modular network systems: The Keystone Snap-In module allows easy integration into patch panels, wall sockets and mounting frames with a standardised insert size of 14.6 x 19.4 mm.

Reliable Cat.5e data transmission: The Cat.5e-compliant design supports structured network cabling with stable signal quality.

Shielded STP design for interference-free connections: The metal housing reduces electromagnetic interference and ensures secure data transmission.

RJ45 socket/socket pass-through 1:1: Direct 8/8 1:1 connection for easy coupling of patch cables without signal conversion.

Cross-manufacturer compatibility: Suitable for numerous keystone carrier frames and modular installation systems.

The InLine® Keystone RJ45 socket/socket module in Cat.5e design is a reliable solution for structured network cabling. Thanks to its standardised snap-in design measuring 14.6 x 19.4 mm, the module can be flexibly integrated into Keystone patch panels, wall connection boxes and

modular mounting frames.

The shielded STP design reduces external interference and supports stable data transmission within network infrastructures. The 8/8 1:1 assignment enables a direct connection of two RJ45 patch cables without changing the signal routing.

This makes the module ideal as a coupler within existing installations or for structured implementation in distribution panels. Thanks to Keystone technology, the number of network ports can be individually adjusted. This enables a scalable network structure that can be tailored to specific requirements.
