Model: 77840S

Manufacturer: INLINE

EAN: 4043718299799

Product Code: 473229

R2,794

This patch cable is specially designed for the transmission of audio/video content to connect transmitter and receiver units in console and video extenders, i.e. devices that use a network cable as a connection cable. The high wire cross-section of AWG23 and the all-copper design also enable image transmission via HDBaseT up to 4K/30Hz over up to 70m without any problems.
