R1,624

LIGHTING THE WAY

TUF Gaming TF120 ARGB system fans bring new layers of cool to your build. Each fan in this 3-pack features a high-luminance, double-layer LED array that pumps out deeply saturated colors against a backdrop of high airflow, low noise, and rugged durability, leaving the competition completely in the dark.

EXEMPLARY PERFORMANCE

DELIBERATELY BALANCED

Rotor. Bearings. Electronics. All optimized to pump out a class-leading 76 CFM, low noise, and balanced static pressure, making the TUF Gaming TF120 ARGB ideal for all chassis positions or radiators that feature low or medium-density fin arrays.

ADVANCED FLUID DYNAMIC BEARING

FIDGET-FREE SPINNER

The TF120 rotor assembly spins on an advanced fluid dynamic bearing rated for up to 250,000 hours of trouble-free operation.

DOUBLE-LAYER LED ARRAY

COLORFUL DIVERSITY

The TF120 features an addressable double-layer LED array that emits light evenly through each fan blade, leaving conventional RGB fans looking washed out. The dual-layer LED structure also facilitates a range of unique lighting effects to make any gaming rig pop.

*Advanced lighting effects require a TUF Gaming ARGB controller, only available in a three-pack of the TF120 ARGB fan.

TWO DISTINCT FLAVORS

TONE UP

The TF120 ARGB also comes in white, for builders seeking to match a lighter aesthetic or establish contrast for their custom rig.
