MASTER OF COOLING AND STYLE

TUF GAMING TR120 ARGB

This case fan stands out with its extra-thick 28mm fan frame, and it is meticulously crafted to provide optimal static pressure and airflow, ensuring heightened cooling performance. Its double-layered LED array and flexible side patterns, synchronized through Aura Sync, are tailor-made for your panoramic chassis or radiators. TUF Gaming TR120 ARGB offers dual colors and orientations, giving you the versatility to master both cooling efficiency and style for your gaming rigs.

THICKER FRAME FOR HIGHER PERFORMANCE

Featuring an extra-thick 28mm fan frame, the TUF Gaming TR120 ARGB case fan establishes a robust foundation, ensuring the delivery of optimal cooling performance.

OPTIMIZED COOLING PERFORMANCE

TUF Gaming TR120 ARGB is meticulously optimized, boasting an impressive 2.75 mmH2O static pressure and a class-leading airflow of 76.3 CFM. Crafted to excel in both chassis and radiator applications, it sets a new standard for cooling performance. The fan blade offers increased flexibility and enhanced airflow control for planning your chassis air channel.

PWM FAN EFFICIENCY

Under the same noise performance, TUF Gaming TR120 ARGB ensures higher PQ optimization and better heat outtake efficiency in ASUS gaming case.

PWM support offers precise fan control via a wide speed adjustment range of 0 to 2000 RPM. You can select silent operation for lighter loads and maximum airflow for more demanding activity.

CRAFT YOUR UNIQUE STYLE

DOUBLE-LAYER LED ARRAY

The TR120 features an addressable double-layer LED array that emits light evenly through each fan blade, leaving ordinary RGB fans looking washed out.

DUO SIDE PATTERNS

Incorporated with dual side lighting patterns, this feature allows for a diverse range of captivating visual displays through versatile arrangements.

DUO COLORS & ORIENTATIONS
