in Your Hands

The ROG Raikiri PC controller puts all the commands you need in the palm of your hand. It features innovative rear buttons that can be programmed and used as hotkeys or to toggle joystick sensitivity. The left and right triggers offer short and full range of movement, with dead zones easily adjusted via Armoury Crate software. Offering full customization options, including joystick sensitivity and response curve, the Raikiri is perfect for gaming on PC, laptop or the next gen Xbox console. And if you're on a gaming headset, the built-in ESS DAC treats you to supreme in-game audio.

Intuitive Rear Controls

Gain the upper hand with ergonomic left and right buttons that are easier to reach and provide a satisfyingly tactile feel with each click. In addition, the buttons can also be programmed for in-game hotkeys or tweak joystick sensitivity on the fly.

Selectable Step Triggers

The left and right triggers offer a full range of motion and include a short trigger lock mode. Trigger dead zones can be customized via Armoury Crate to suit user preference.

Premium Audio

Plug a headset into the 3.5 mm jack for premium, true-to-life audio, powered by the built-in ESS DAC.

Extremely Customizable

Use Armoury Crate to map buttons, adjust RGB Aura lighting, vibration strength, trigger dead zone, and joystick response curves. It's easy to tailor controls for any game.
