

Zyxel SFP-SX-D network transceiver module 1000 Mbit/s 850 nm

Model: 91-010-204001B

Manufacturer: ZYXEL

EAN: 4718937510344

Product Code: 476485

R2,018

SFP ports mean flexibility. The flexibility to choose which fiber you want to run and what sort of distance you need. They save money by allowing you to use existing fiber so you don't have to run more. Instead of buying a switch with built-in fiber ports, buy a switch with SFP ports that allows you to choose what type of fiber transceiver you want to use on a port-by-port basis.

- Gigabit Performance Transmission and Flexibility
- Small Size and High Port Density
- Industry Standard-based Compliance

Gigabit Speed and Flexibility

ZyXEL's Small Form-factor Pluggable (SFP) transceiver family provides performance and flexibility with full duplex Gigabit speeds and hot-pluggable into Gigabit Ethernet port.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Small Size and High Port Density

ZyXEL's SFP transceiver's compact design provides high port density. For example, ZyXEL GS-3012F switch can connect up to 12 fiber links - all at an affordable price.

Industry Standards-based Compliance

ZyXEL's SFP transceiver family is compliant with IEEE 802.3z and SFP MSA allowing easy interoperability with all standard compliance devices from different vendors.
