

be quiet! DC2 PRO heat sink compound Thermal grease 80 W/m·K 1 g

Model: BZ005

Manufacturer: BE QUIET!

EAN: 4260052189603

Product Code: 485395

R1,248

DC2 Pro is the thermal grease of choice for high-end chips that generate massive heat. The extremely high thermal conductivity makes for an exceptional heat transfer between the chip and the cooler. If you are a professional user or die-hard enthusiast striving for maximum cooling, DC2 Pro is the thermal grease of choice.

EXTREMELY HIGH COOLING

For cooling power under all conditions

The extremely high thermal conductivity of 80W/mK provides exceptionally fast heat transfer between chip and cooler at a wide temperature range from 20°C to 200°C. By that the cooling power of DC2 Pro is far beyond any other thermal grease of be quiet! and the ultimate upgrade of high-end coolers for top notch cooling performance.

LIQUID METAL GREASE

Another type for another level

Consisting of liquid metal, DC2 Pro offers cooling power beyond belief. The characteristics of liquid metal allow this thermal grease to cool high-end CPUs and GPUs even at their limits. Only for use with nickel plated coolers, do not use with HDT and aluminum surfaces.

EXTENSIVE CONTENT

A long-life companion

1g of content is enough for up to 10 applications – a true testament to the sheer power DC2 Pro provides. 2 cotton swabs in the scope of delivery make for an easy and clean application on the CPU. The alcohol pads that come with DC2 Pro allow the user to purge the CPU thoroughly without residues.
