

i-tec Metal USB-A/USB-C HUB 2x USB 3.0 + 2x USB-C (10 Gbps)

Model: C31HUBMETAL2A2C

Manufacturer: I-TEC

EAN: 8595611703904

Product Code: 486561

R1,184

USB-A, USB-C and Thunderbolt™ 3 or 4 are ever more popular on modern laptops and tablets. Along with this more widespread use also comes a decrease in the number of USB ports on laptops. If you need to connect accessories to your device and find that you have a shortage of ports, this little, handy hub is here to help.

The hub provides 4 additional USB ports: two standard USB 3.2 Gen 2 ports, and two USB-C ports. Connect your external keyboard and mouse, transfer data or films from a USB flash drive at a speed of up to 10 Gbps or charge your mobile devices (at standard USB speed with 0.9 A).

The hub requires no drivers, simply connect it by a USB-C cable and you can start using it immediately. The hub features built-in overvoltage protection for your computer for the event of a short circuit in your peripherals. And of course, the hub is backwards compatible with USB 2.0. Thanks to its compact size and low weight, you can carry the hub in your bag at all times – its metal casing protects it from damage or scratches.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
