

2-Power USB 3.0 Dual Display Docking Station

Model: DOC0101A

Manufacturer: 2-POWER

EAN: 5055190174340

Product Code: 493692

R4,125

The 2-Power USB 3.0 SuperSpeed? Universal Docking Station enables easy connection to your desktop environment via a single USB 3.0 cable, enjoying total compatability with USB 3.0 Laptops and Ultrabooks. The compact and sleek design make this docking station perfect for home and office, reducing cable and peripheral clutter on your desk or workstation. DisplayLink® technology enables dual-head functionality at every workstation with most operating systems. Extend your desktop onto two full HD screens, all via the same USB 3.0 cable. The docking station gives you multiple device connectivity: 6 USB ports (2 x SuperSpeed? USB3.0 and 4 x USB 2.0) for a keyboard, external HDD, speakers and other devices. There is a Gigabit Ethernet port for high speed network connectivity. DisplayLink® graphics technology works across computing platforms and connector types, providing a solution to connect multiple displays and docking functionality to any platform. The docking station uses the built in USB, networking, and display management software that comes with your computer - so plugging in a DisplayLink® compliant product is just like plugging in directly to your computer.
