Nebula Cloud

Manage Devices Anywhere

Managing mobile routers behind carrier grade NAT can be challenging and expensive as you need to buy VPN service or lease extra landline from ISP. This is where Nebula Cloud comes to help!
Nebula Cloud platform provides real-time network management anytime anywhere with ease. Centrally provisioning and seamlessly manage all networking devices, including access points, switches and firewalls within your organization that are across distributed locations from the Nebula platform, while keeping your network aware of constantly changing devices.
Get the richest collaboration with everything you need on a simplified and unified Nebula Could platform. Get started now!

5 Gbps

Powerful Chip, 5G Unleashed

Thanks to the mind-blowingly fast chip, which is designed with an integrated quad-core Arm CPU, it provides 5G speeds of up to an impressive 5 Gbps* right out of the box. Along with the two integrated 2.5 Gbps Gigabit Ethernet interfaces, allowing it a wide range of LAN port configurations for ultra-fast speed for connection to servers, workstations, or high-end gaming devices.
Get groundbreaking performance in both speed and wide-spectrum bandwidth for multi-streaming data access and reduce network latency for premium and time-sensitive internet services now!

3.6 Gbps

Accelerate with WiFi 6

Fast and vast. When 5G meets WiFi 6, they can boost larger bandwidth and capacity than previous legacy solutions. The Nebula FWA510 offers speeds of up to 3.6 Gbps** on dual bands with the latest WiFi 6 (AX3600) standard. Nebula FWA510 can deliver an optimal seamless high-speed WiFi experience to 64 wireless devices simultaneously.

24/7

Non-stop Connectivity

Nebula FWA510 ensures that you’ll have internet access even during a fixed line network outage with the WAN failover capability, which allows Nebula FWA510 to either serve as a primary or backup option for internet access according to your needs. It is equipped with four external TS9 antenna ports***, allowing you to improve mobile broadband reception when you are in a weak-signal area. Strong and stable connection work together to give you the power and flexibility to achieve greater
