R2,695

REAL 16000 DPI OPTICAL SENSOR

AORUS M5 boasts an enthusiast-grade 16000 DPI optical sensor (Pixart 3389), capable of 400ips and 50G acceleration, that gives you the ultimate accuracy for competitive gaming. Adjustability in 50 DPI increments further allows you to make a seamless transition from your old mouse by fine-tuning the level that precisely fits your play style.

FIND YOUR OPTIMAL WEIGHT AND BALANCE

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The revolutionary weight distribution system allows you to customize the center of gravity and weight range from 118g to 130.5g for speed, accuracy, and performance while gaming.

50-MILLION-CLICK OMRON SWITCH

The Japanese Omron switches on both buttons provide the most comfortable experience with crisp, tactile response at your fingertips. The switches are also engineered to guarantee extended life time of over 50 million clicks.

RGB FUSION 2.0

With 16.7M customizable color options and numerous lighting effects, you can choose lighting effects or synchronize with other AORUS devices.

ERGONOMIC RIGHT-HANDED DESIGN

AORUS M5 is crafted for right-handed users for optimal comfort. The ergonomic design fitting both palm and claw play style, allows you to hold the mouse in the most natural position. Anti-slip rubber grips on both side gives you absolute control over the mouse.
