R1,345

IADAP USBC-VGAC is a USB-C™ to VGA Adapter. It allows you to transmit signals from a USB-C™ source to a high definition VGA display (TV sets, projectors, etc). It can work on Macbook or Google new Chromebook Pixel and other USB-C supported devices. With this product, you can watch videos or slideshows together on the big screen.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
