Model: LPS252

Manufacturer: LOGILINK

EAN: 4052792060591

Product Code: 505675

R1,119

Whether as an extension or as an option to be able to connect even more devices for example to a single wall oulet, LogiLink's power strip LPS252 enables you to do both. The 4 safety sockets are arranged at an angle of 90°, making it easier to plug in angled plugs. Each socket is individually switchable, as each socket has its own illuminated ON/OFF switch. An extra switch, which is also illuminated like the individual switches, ensures that the entire strip can be switched off quickly and easily, even in the dark. In addition, the LPS252 has overvoltage protection, sockets with safety shutter and and drill holes for wall mounting. With the multiple power strip from LogiLink you gain a practical helper for every room, because due to its cable length of 1.5m you now have even more freedom when placing your devices, whether it is at home or in the office.
