

GENESIS Thor 230 TKL Lite keyboard Gaming USB QWERTY English Black

Model: NKG-2076

Manufacturer: GENESIS

EAN: 5901969443264

Product Code: 513872

R1,363

Looking for an elegant keyboard whose backlighting won't be distracting while working and playing? Meet the Thor 230 TKL Lite! It's a variant made for those who want to focus their thoughts and actions on the tasks at hand - for whom reliable hardware performance and a stylish, professional and good-looking appearance are most important.

INSTANT MODIFICATIONS THANKS TO HOT SWAP

No expertise in keyboard customization, but would like to change the switches? Don't worry! Thanks to Hot Swap technology, you'll be able to swap them yourself in no time with the Thor 230 TKL Lite.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The tool included in the box will help you do this, making it possible for virtually anyone to change the switches efficiently.

PRECISE OPERATION

The Outemu Red switches are an optimum solution that users who use the keyboard for both work and entertainment will be happy with. This is thanks to the low actuation force of only 45 g and a low click activation point of 2 mm. As a result, the click is registered more precisely than with membrane keyboards.

COMFORTABLE USAGE

The merit of the comfortable use of the Thor 230 TKL Lite keyboard does not lie only in the structure of the switches, but also in the high-quality lubrication of the stabilizers. This is a guarantee of excellent quality and enhanced working performance for a long time.

QUIETER WORK

The quiet operation is influenced by the PCB soundproofing foam. The additional soundproofing under the spacebar is also an attractive feature - this makes using this button quieter when playing many video games than other keyboards of this type.

VISUAL EFFECTS

One of the key changes of the Thor 230 TKL Lite, compared to the standard model, is to minimize the device's backlighting features to a minimum. Choose from 25 predefined lighting effects of the multi-colour Rainbow keyboard backlighting and focus on the most important tasks - whether you are working or playing.

PLAY ON YOUR OWN RULES

Prefer a console to a computer for gaming? No problem! With the Thor 230 TKL Lite, you'll connect with your favorite device - the keyboard is compatible* with both PS5 and PS4, as well as Xbox Series X/S and Xbox One. *Ensure whether your game supports control with the keyboard.

STYLISH DESIGN

A distinctive feature of the Thor 230 TKL Lite keyboard, like its standard version, is the closed non-floating design. This design contributes to the longevity of the device and prevents dust and dirt from collecting between the keys, as is the case with open floating designs.

CABLE MANAGEMENT

The detachable cable makes it easy to use the keyboard on a daily basis and to transport it if necessary. The socket is hidden inside the base, guaranteeing a stable connection. Special guides, meanwhile, allow for better organization of the cable on the desk.

TILT ADJUSTMENT FOR GREATER COMFORT

Long hours of keyboard use require a comfortable hand position to avoid wrist pain. Adjust the position of the Thor 230 TKL Lite to your personal preference with the dual-folding legs that allow you to change the tilt of the keyboard.

SOFTWARE

You will operate the Thor 230 TKL Lite using dedicated software. It is with its help that you have the possibility to record special macros to make working or playing easier, which will be saved on the device thanks to the built-in memory.
