

BenQ PianoLight R monitor light Black 1070 lm

Model: 9H.W4JWT.ES1

Manufacturer: BENQ

EAN: 4718755090615

Product Code: 514452

R5,113

3D Optical Design

PianoLight

World's first smart and eye-caring piano light that evenly lights up both the sheet music and the piano keys.

3D optical design

Evenly Illuminates Both Sheet Music and Keys

BenQ's exclusive 3D optical design allows the light to evenly illuminate both the sheet music and all 88 keys.

3D optical design

Evenly Illuminates Both Sheet Music and Keys

A parabolic reflector is first used to bring together the scattered light. With a reflection rate of 97%, it greatly improves the light efficiency. The multi-zonal lens then provides uniform illumination in the centre while lighting up the keys at both sides.

3D optical design

Evenly Illuminates Both Sheet Music and Keys

It guarantees an illumination level more than 500 lux for sheet music, with great illuminance ratio of 1.5. All 88 piano keys are also guaranteed to have a light level more than 300 lux. * SGS testing report-- measured under a fully dark environment with a colour temperature of 5000K.

Eye care hood

Further Eliminates Direct Glare

The special design of the eye care hood allows users to enjoy fully illuminated sheet music and piano keys without being affected by dazzling direct glare.

Safest Light Source

No Blue Light Hazard

Provides you with the safest and best quality light while practicing piano—BenQ PianoLight has passed the EU IEC EN62471 and IEC TR62778, posing no blue light hazard.

Safest Light Source

Flicker-Free

BenQ PianoLight uses a built-in anti-flicker chip that ensures the stability of the electric current and prevents any harmful flicker. It is certified flicker-free by the IEEE PAR1789 LED Stroboscopic

Specification.

Auto-dimming

Get the Right Amount of Light

Activate the auto dimming function with one simple tap- bringing you the proper brightness based on the ambient light. In auto-dimming mode, BenQ PianoLight will provide 500 lux of illumination for the sheet music.

Presence detection

Automatic On/Off

With the help on the passive infrared sensor, PianoLight can automatically switch on/off when it detects the presence/absence of the user, reducing power wastage. The lights are automatically switched off 10 minutes after the user leaving the seat.

Adjustable brightness & colour temperature

Adjust the Light According to Your Needs

PianoLight provides a colour temperature adjustment range of 2700K-5000K, as well as 15 different brightness levels. Adjust to warm white light to create an atmosphere and enhance creativity; while white light can help improve your concentration. Hold the “my favourite” button for two seconds to save the current settings.

BenQ Smart Lighting

Don't Settle for Less

BenQ lighting strives to bring you the most sophisticated piano light possible through meticulous research and development.

Details Matter

Base Groove Design

The base groove design of the BenQ PianoLight allows the lamp to perfectly fit the hinge of the upright piano's cover, thereby sitting stably on the piano.

Details Matter

Weight, Protection and Sound Quality.

We collaborated with piano manufacturers to ensure that the weight of the BenQ PianoLight does not impact the structure of the piano. Additionally, the anti-slip rubber on the bottom of the lamp prevents any scratches to the piano and reduces sound resonance to ensure the piano's sound quality.

Details Matter

Safety Strap

Simply install our safety strap to further ensure that the lamp will not fall due to any accidents.

With craftsmanship in mind

Featuring an Elegant Design that Complements the Piano

The BenQ PianoLight features an overall color scheme of black and gold, with a matte black aluminum alloy finish and a anodized ball shaft. The classic color combination and sleek design allow the BenQ PianoLight to seamlessly blend into your piano corner.
