

Cycplus T2 smart bike trainer

Model: T2

Manufacturer: CYCPLUS

EAN: 6976297860020

Product Code: 515521

R14,646

Cycplus T2 intelligent bicycle trainer

Cycplus T2 is a smart direct-drive bicycle trainer designed for accurate and realistic cycling training at home. The device offers power measurement accuracy of up to $\pm 1\%$, the ability to simulate climbs of up to 20% and support for modern ANT+ FE-C and Bluetooth Smart connectivity protocols. With a slim 55mm design, a sturdy folding base and a weight of 17.3kg, the product combines high functionality with easy storage. The T2 is designed as a standalone powered version, with the option to connect an external power source to extend the simulation function.

Power measurement accuracy without calibration

The Cycplus T2 trainer provides precise power measurement with a deviation of no more than $\pm 1\%$, allowing for training based on reliable and repeatable data. The device does not require manual calibration, making it ready to use almost immediately after connecting. Such high accuracy makes it easy to track progress, implement interval training and compare results between sessions without

the risk of errors.

Simulation of ascents and descents

The Cycplus T2 can simulate uphill climbs with a maximum gradient of 20%, allowing you to realistically replicate challenging mountain trails. When connected to an external power source, the trainer also supports simulation of descents, during which the motor reduces resistance and increases the inertia of the system. This solution improves the smoothness of the ride and provides a more realistic experience.

Virtual gear shifting

The T2 supports virtual gear shifting, which enables smooth adjustment of resistance without physically changing gears in the bike's drive. This solution eliminates chain noise and allows for a more consistent, comfortable workout. Note: the feature requires the Cycplus BC2 remote control (sold separately) and is not available in ERG mode.

Quiet operation and efficient cooling system

The trainer's beltless design eliminates mechanical noise sources, significantly reducing the sound level while riding. The cushioned feet effectively absorb vibrations, and the included 6mm-thick training mat reduces the transmission of vibrations to the ground. This makes the Cycplus T2 perfect for training in an apartment - don't worry about disturbing other household members. Also noteworthy is the dual fan, which, combined with the heat conduction system, protects the trainer from overheating.

Stable folding base, slim design and mobility

The trainer is equipped with an X-shaped folding base, which ensures high stability even during intense sprints. The design is distinguished by a load capacity of up to 100 kg, which allows safe use by a wide range of users. When folded, the device takes up little space, making it easy to store. At the same time, the T2 model is surprisingly slim - the thickness of its housing is only about 55 mm. What's more, the integrated enlarged transport handle and the weight of 17.3 kg allow it to be carried comfortably.

Operation without external power supply

The Cycplus T2 trainer can operate in autonomous mode, allowing you to use it anywhere. Forget about the limitations of not having access to electricity! You can also connect the device to power to use the downhill simulation function.

Wide compatibility

The trainer supports ANT+ FE-C and Bluetooth Smart protocols, which ensures compatibility with popular workout apps such as Zwift and FulGaz. The T2 also works with bike counters from well-known brands, including Garmin and Bryton. This allows you to tailor the device to your workout ecosystem, conveniently sync data and analyze progress. There's also the CYCPLUS app, which allows you to customize settings to suit your training needs.

Bike and drive compatibility

Cycplus T2 is compatible with frames equipped with 12×142 mm and 12×148 mm rigid axles, as well as 5×130 mm and 5×135 mm quick release frames. The unit works with HG cassettes with a speed range of 8-12, as well as XDR and XD cassettes (not included). The trainer comes with a pre-installed 11-speed cassette.

Included

- Cycplus T2 x1 bicycle trainer
- Cassette (pre-installed) x1
- Right through-axle adapter (factory installed) x1
- Thru-axle adapter left (factory installed) x1
- Quick release adapter right x1
- Quick release adapter left x1
- 17 mm wrench x1
- Allen wrench x1
- Cassette spacer 8-10 x1
- Cassette adjustment spacers x7
- Disc brake spacer x1

- Hydraulic disc brake pad spacer x1
- Quick installation system x1
- AC power adapter x1
- AC power cord x1
- Training mat x1

Manufacturer Cycplus

Model T2

Accuracy of power measurement $\pm 1\%$

Maximum simulation slope 20%

Connectivity ANT+ FE-C, Bluetooth Smart

Case thickness 55 mm

Weight 17.3 kg

Maximum load 100 kg

Standalone mode Yes

Calibration Does not require

Maximum torque 85 N.m

Frame compatibility 5×130/5×135 (quick release), 12×142/12×148 (through axle)

Cassette compatibility 8-12 HG cassettes, XDR/XD cassettes (not included)

Installed cassette 11-speed
