Darflash FT418 computer case + 6 aRGB fans (black)

Darkflash FT418 is a compact computer case designed for users who appreciate both aesthetics and functionality. It is equipped with three transparent tempered glass panels and six ARGB fans, so it perfectly combines cooling performance with a modern gaming design. It's also compatible with a wide range of popular components, so you can build a computer perfectly suited to your needs.

Robust and spacious design

The FT418 case is made of durable metal (0.5 mm SPCC steel), which ensures its stability and strength. Despite its small size, it is very spacious - it allows you to mount a graphics card up to 400 mm long, a PSU up to 200 mm long and a CPU cooler up to 157 mm high. It also features compatibility with M-ATX and ITX motherboards. All this makes it easy for you to assemble a high-

performance gaming or office PC!

Advanced cooling system

The FT418 allows you to create an extensive heat dissipation system - it will accommodate up to 9 fans. You can also install 360 mm water cooling in it. All this will allow you to freely play dynamic games or create complex graphics projects - without worrying that the computer will overheat! What's more, you'll find six powerful ARGB fans included, which are distinguished not only by their high efficiency, but also by their modern, stylish design.

Various storage options

The Darkflash FT418 enclosure can support three 2.5" SSDs or two 3.5" HDDs, giving you the flexibility to customize your storage. It's ideal for those who plan to store a lot of files, such as photos, videos or documents.

Key ports and buttons

The FT418's top panel features one USB 2.0 port and one USB 3.0 port for high-speed data transfer. So you can conveniently transfer files and connect peripherals of your choice! There is also an audio jack port, a Reset button and a power button.

Unique panoramic perspective

The case is distinguished by three transparent panels made of tempered glass, so it provides a wide, panoramic view of the computer interior. Such a solution allows you to highlight individual components in an original way! For example, use components with RGB backlighting to give your equipment a unique gaming character.
