Freewell Split ND Filter Set of 4 for DJI Air 3S

Freewell's Split ND Filter Set of 4 is a must-have accessory for anyone who wants to achieve balanced exposure and capture beautiful landscapes with their DJI Air 3S drone. The set includes four Split ND (Split Neutral Density) filters - ND8/ND16, ND16/ND32, ND32/ND64 and ND64/ND128, which allow you to control the amount of light entering the lens and get the right exposure.

With different lighting conditions in mind

Meticulously calibrated for the Air 3S's various apertures at 70mm and 24mm focal lengths, the Split ND filters ensure high-quality exposures. They ensure that footage remains optimally exposed at both focal lengths, maintaining high image quality. It also eliminates the need to constantly adjust the aperture on the fly, so you can focus on capturing the perfect shot. Whether you want to take photos in bright sunlight or achieve a blur effect, you'll achieve stunning results with the Freewell!

Thoughtful design

Mounting the filters will not be a problem for you. You also don't have to worry about them interfering with the operation of your drone - the filters are extremely lightweight. The kit also comes with a case, which allows you to store the filters safely and ensures their protection from damage. In turn, the cloth will make it easy to keep them clean.

In the set

- filters (ND8/ND16, ND16/ND32, ND32/ND64, ND64/ND128)
- case
- cleaning cloth
