

Darkflash DV240S CPU water cooler (white)

Model: DV240S WHITE

Manufacturer: DARKFLASH

EAN: 4711527000973

Product Code: 515570

R2,161

Darkflash DV240S CPU water cooling (white)

Darkflash DV240S cooling is a combination of advanced technology, outstanding performance and striking style, created for the most demanding users. Compatibility with Intel and AMD platforms and the ability to install stylish ARGB backlighting make it an ideal choice for any gamer. Equipped with an easy-to-read square IPS LCD screen, it provides realistic images and easy access to key information. Thanks to its robust aluminum radiator and powerful PWM fans, it offers excellent thermal efficiency, even during intense gameplay. Discover the comfort of quiet operation and impressive durability with Darkflash DV240S water cooling!

Clear LCD display

The cooler is equipped with an impressive IPS LCD screen with a resolution of 320 x 320 pixels, distinguished by its square form factor. Unlike traditional round screens, this model offers a more natural, aesthetically pleasing presentation of data, blending harmoniously with the modernistic look of gaming PCs. The IPS panel guarantees realistic color reproduction and excellent readability from any angle. With the Darkflash DV240S you gain clear and convenient access to the most important information about your hardware.

Copper block - performance at the highest level

The key element of the DV240S is a water block made of pure copper, providing excellent thermal conductivity. Thanks to it, heat is effectively removed from the surface of the processor, resulting in significantly lower operating temperatures and greater system stability even during intense gaming sessions. This is a reliable solution for every gamer!

Powerful heatsink for better performance

The large 240-millimeter heatsink made of high-quality aluminum ensures efficient heat dissipation, which is crucial especially when overclocking (overclocking) the CPU. Its robust design and large heat dissipation area effectively supports the entire system in maintaining optimal operating temperature, giving you more space for comfortable overclocking.

High performance and quiet operation

Darkflash DV240S cooling combines outstanding performance with extremely quiet operation. A set of two 120 × 120 × 25 mm fans provides efficient airflow with minimal noise. The fans generate a pressure of 1.85 mm-H₂O and an airflow of 70.62 CFM with minimal noise, allowing you to focus on work or entertainment without unnecessary distractions.

Perfect design for demanding gamers

The DV240S cooling system features a 2,700 RPM (±10%) pump with high operating culture and low power consumption (maximum 7.20 watts). The well-thought-out design, based on a 240 mm aluminum heatsink, guarantees comfortable use, durability and reliability. In addition, an integrated voltage start system (from 6V) ensures instant readiness for operation.

Compatibility with leading platforms

Thanks to its wide compatibility, the DV240S supports many motherboard models, additionally working with RGB LED Sync technology. This makes installation of the cooler extremely simple, and the user gains the ability to personalize the lighting effects as desired. In addition, the cooling is fully compatible with popular Intel and AMD processor platforms, guaranteeing versatility and wide application in various hardware configurations.

Included

- ARGB PWM 120mm fan x2
- fan mounting screws x8
- heatsink mounting screws x8
- USB-C to USB 2.0 cable
- PWM hub
- fiber board
- user manual

Manufacturer	Darkflash
Model	DV 240S
Dimensions of water block	73.1 × 73.1 × 72.4 mm
Dimensions of the heatsink	292 × 120 × 27 mm
Cable length	440 mm
Rated voltage of the pump	DC 12 V
Pump starting voltage	≥6 V
Current consumption of the pump	0,6 A
Power consumption of the pump	7.20 W (max.)
Dimensions of the fans	120 × 120 × 25 mm
Rated voltage of the fans	12 V
Starting voltage of the fans:	≥6 V

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Fan speed	800-1800 RPM $\pm 10\%$
Rated current of fans	0,65 A
Noise level of fans	30 dBa $\pm 10\%$
Air flow rate	64.05 CFM $\pm 10\%$
Air pressure	1.85 $\pm 10\%$ mm-H ₂ O
Power consumption	7.20 W (maximum)
Color	White
