Petlibro Granary food dispenser with double bowl 5L (white)

Petlibro Granary is an advanced automatic food dispenser with a capacity of 5 liters, designed for owners of two pets. Equipped with two stainless steel bowls and an adjustable divider, it allows you to evenly or individually dispense portions for each pet. You'll set the feeding schedule easily thanks to a clear panel with LED display, and your voice can accompany your pets during the meal thanks to the message recording function. The advanced anti-clogging system with IR sensor and silicone rotor ensures smooth operation without blockages. The four-stage sealed design protects the food from moisture and loss of freshness, and the transparent window makes it easy to check the food level. The dispenser operates in dual power mode, ensuring reliable feeding even during power outages. With Petlibro Granary, your beloved pets will always be taken care of.

The perfect solution for two pets

Petlibro Granary with double bowl is an excellent choice for owners of two cats or dogs. Instead of buying two separate units, you can conveniently feed both pets from one dispenser. With the simultaneous feeding feature, both pets get their meal at the same time - no fighting over the bowl and no stress. The specially designed divider allows you to adjust the amount of food in each bowl, just turn it to the right side to evenly distribute the portion or increase it on one side. The feeding schedule can be easily set using the easy-to-read panel with a 45° tilt, and each animal will get food at fixed times according to its individual needs.

Safety and freshness in every serving

The Twist-Lock closure, silicone seal, moisture absorber and tight rotor design create an effective four-level sealing system that protects food from moisture, oxidation and theft from curious paws. This keeps food fresh, flavorful and appetizing for longer. In addition, the 304 stainless steel bowls are rust-resistant, easy to clean and completely safe for your pets. The entire dispenser was created from food-grade, BPA-free materials, ensuring that your pet receives fresh and healthy food.

Advanced technology, simple operation

Petlibro Granary uses a three-component anti-obstacle system with a silicone rotor and an infrared sensor that automatically stops dispensing if an obstacle is detected. This ensures that the device works reliably even with larger pieces of dry food (it is recommended to dispense food between 2 and 15 mm in size). You can also record a 10-second message, which will be played up to five times at each meal - so your pet associates the feeding time with your voice, feeling safe and comfortable. The transparent window makes it easy to check the amount of food in the 5-liter tank, and the easy-to-remove components (except for the base) allow you to maintain cleanliness and hygiene on a daily basis.

Ready for any situation

The dispenser operates in dual-power mode - on a daily basis via a USB-C cable, and in the event of a power outage, it automatically switches to D-type batteries (available for sale separately). This ensures that your pets never miss a meal, regardless of the situation. With an intuitive dedicated app, you can manage the dispenser, which greatly enhances the user experience. Simple setup, thoughtful design and feeding safety make Petlibro Granary a reliable solution for any home with two
