Petlibro Granary WiFi food dispenser, 5L (white)

Petlibro Granary is a 5L smart food dispenser that allows you to remotely feed your pet from the app - wherever you are. It allows you to precisely plan meals, set a personalized voice message, and view feeding logs. With its quadruple sealing system, it ensures the freshness of the food, and the advanced design prevents it from jamming. The dispenser even works during a power outage (using batteries), and the removable steel bowl and BPA-free components ensure safety and easy cleaning. This is a convenient, reliable and hygienic solution for any four-legged dog owner.

Smart feeding always at hand

Petlibro Granary will revolutionize the way you take care of your pet's diet. With Wi-Fi support (2.4 GHz and 5 GHz) and a dedicated app, you can plan portions, customize schedules and serve treats

remotely - wherever you are. Whether you're at work or away, it only takes a few clicks to ensure your pet gets a meal on time. Its impressive 5L capacity ensures that your pet always has the right amount of food, and if supplies run out, don't worry - the app will notify you of everything!

A new level of control and convenience

From the app, you can turn feeding schedules on and off with a single tap, as well as set a personalized voice message that will be played at each meal, so your pet will feel your presence even in your absence. In addition, the app saves up to 70 recent feeding logs, including offline, and notification features will let you know if the food is low, the battery is running low, or the feeder is possibly blocked.

Safety and freshness first

The quadruple sealing system (silicone ring, swivel-lock lid, special moisture-absorbing bag and protected outlet) protects the food from air and moisture. This keeps each serving as fresh as the first. Non-slip feet stabilize the unit, and the nylon braided cable prevents overbiting. With Petlibro Granary your pet gets maximum convenience and protection.

Smooth feeding and reliability

Innovative design with 45-degree angle, wide opening and special anti-jamming algorithm avoids feeding problems. The dispenser handles dry pellets from 2 to 15 mm in diameter. In the event of a power failure, the dispenser still works - just power it with batteries (available outside the kit) to ensure continuous feeding.

Easy cleaning and hygienic materials

The removable 304 stainless steel bowl prevents grease buildup and chin acne. All parts in contact with the food are BPA-free, making the device completely safe for your pet's health. The removable design makes cleaning easy, and the built-in infrared sensor protects against overfilling.
