Petlibro Granary food dispenser with camera, 5L (white)

Petlibro Granary with Camera is an advanced 5L food dispenser that provides convenient and remote feeding of your pet and constant contact with your pet, no matter where you are. The built-in 1080p HD camera with night mode and 145° viewing angle allows you to view your pet around the clock, while motion and sound detection allows you to immediately respond to your pet's activity. With two-way voice communication, you can speak to your pet and hear its response, as well as set a recorded message at meals. An intuitive app lets you remotely plan feeding schedules and adjust portions, and the device works with both 2.4GHz and 5GHz Wi-Fi networks. The dispenser handles dry food, ensuring fresh and nutritious food at every meal. It's a smart solution for anyone who wants to care for their pet even remotely.

Always be close to your pet

Petlibro Granary will take care of your pet's regular feeding and allow you to be in touch with your pet no matter where you are. Equipped with a 1080p HD camera with a 145° viewing angle and an infrared night vision function, it allows you to monitor your cat or dog around the clock, even in the dark. Thanks to the unique, downward-facing camera position, you're sure to see exactly what matters most - your pet - without showing the entire interior of your home.

Respond to every movement and sound

Advanced motion and sound sensors allow you to stay on top of what's going on in your home. When the dispenser detects meowing, barking or movement in its field of vision, it automatically starts recording and sends you a notification in the app - this way you won't miss any important moment. You can watch the recorded video or connect live and see what your beloved pet is doing. You can adjust the sensitivity of the sensors and the viewing range to avoid false alarms.

Speak to your pet wherever you are

Petlibro Granary allows you not only to observe, but also to communicate with your pet. Thanks to the two-way audio system, you can remotely speak to your pet, hear its reaction and make it feel safe, even if you're away from home. You can also set a 10-second voice recording to be played at every meal. This way your pet will quickly learn to recognize the feeding signal and eagerly approach the bowl.

Control feeding from within the app

Manage your pet's feeding schedule from your smartphone. Petlibro's dedicated app (supporting 2.4GHz and 5GHz Wi-Fi) allows you to set the number of servings, meal times and ration sizes according to your pet's diet and needs. It's perfect for owners who want to take care of their pets' healthy eating habits and not worry about whether they've been fed on time. Whether you're at work, on vacation or on a business trip, with just a few clicks you'll have everything under control.
