

Reviber RV-VIPL/ER-02 Plus Oscillating Vibration Plate Exerciser ER02

Model: RV-VIPL/ER-02

Manufacturer: REVIBER

EAN: 5019487089298

Product Code: 601914

R5,894

Oscillating vibration plate.

Maximum 12mm amplitude giving an intense and effective workout.

It is lighter, more compact, more portable and more powerful than similar products.

Lightweight. At only 16.5 kg, it is portable and can be moved from room to room if needed.

Adjustable Auto-Programme where you can set your own highest speed, which means that the autoprogramme doesn't force you to exercise beyond your limits. This programme allows you to just concentrate on the exercises.

Lanyard for remote control. Having the lanyard clipped to the remote control means you can just keep the remote around your neck while you are using the machine, so you do not have to keep taking it out of your pocket to change speed or functions of the machine.

Full colour exercise instruction manual including 11 different exercises, with recommendations on how long you should do each exercise for and at what intensity.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

500W Run Quiet motor. Reviber give a 5 year guarantee on this motor because of its power and durability.

Anti-drag resistance band channels. They ensure a smooth controlled movement when pulling on the resistance bands, giving maximum load to the muscle group targeted.

Designed to be used in apartments. The case of the machine doesn't move, only the platform you stand on, which means there's virtually no vibration transmitted into the floor. This makes it ideal for people that live in apartments.

Maximum user weight 200kg.
