Want to play music fully wirelessly? Meet the Genesis Helium 610 BT, which, thanks to the BT module, will allow you to pair your equipment with any device. Forget about connecting additional cables - from now on, listening to music can be even easier.

FEEL THE EMOTIONS

A good sound system is the basis of any gaming stand, as it allows to make the game more attractive and increase immersion. This is exactly what the Genesis Helium 610 BT will offer you - a 2.1 set with a total power of 60 watts. Use the power of the subwoofer and enjoy powerful bass. You will also appreciate the 2 speakers that will offer not only spaciousness, but also enhance every detail. With the Genesis Helium 610 BT you will feel what until now seemed unattainable.

MORE BASS

Do you love low tones? If so, the subwoofer of the Genesis Helium 610 BT set will give you what you need. Its power comes from a 6.5-inch speaker housed in a bass-reflex enclosure made of rigid MDF material. A special vent increases the amount of bass and contributes to better reproduction of low components of sound. Want to control the sound? We have equipped the side panel of the subwoofer with a clear control panel with potentiometers for changing the bass and volume. With it you can easily adjust the sound to your preferences.

AND MORE DETAILS

Even more details. Hear them thanks to two satellites equipped with 3-inch diameter diaphragms, providing high quality mid and treble. What's more - thanks to magnetic shielding, the speakers do not interfere with other devices.

EVEN SIMPLER CONTROLS

Take advantage of a remote control that you can always have at hand. We've equipped it not only with a volume knob, but also with a mini-jack output for headphones and a mini-jack input for mobile devices. All you have to do is connect it to the subwoofer with a 1.7-meter cable.
