

Lindy TosLink (Optical) and Coaxial to Phono DAC

Model: 70368

Manufacturer: LINDY

EAN: 4002888703680

Product Code: 627669

R1,514

ADCs and DACs allow for simple connectivity of digital or analogue audio equipment to modern, or legacy audio inputs.

The Lindy TosLink (Optical) and Coaxial to Phono DAC allows the user to easily convert uncompressed digital stereo audio signals from Coaxial and Toslink inputs to an analogue stereo audio output. This device provides a high quality audio experience with support for a high sampling frequency of up to 24 bit / 96kHz, ensuring content can be heard exactly how the artist and sound engineers intended, with greater detail and clarity.

With both Optical and Digital Coaxial input connections, that can be connected individually or consecutively to ensure seamless compatibility, and L/R Phono outputs, this audio converter is a perfect solution for connecting Blu-Ray Players and games consoles to older audio amplifiers, receivers or 2-channel speaker systems, with no loss in audio quality for a superior 2-channel audio experience.
