Connect an HDMI-enabled source to a DisplayPort monitor with support for resolutions up to 8K at 60Hz

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

This HDMI 2.1 to DisplayPort 1.4 adapter connects an 8K 60Hz HDMI video source, such as a laptop or desktop, to a DisplayPort monitor.

8K 60Hz Resolution

This 1ft (30cm) HDMI to DisplayPort video converter supports resolutions up to 7680 x 4320 at 60Hz*. It supports HDR, HDCP 2.3, CEC, ARC, and 2-channel DisplayPort audio. Additionally, it supports lower resolutions such as 4K 120Hz, 4K 60Hz, and 1080p.

*DSC support on the host is required to achieve maximum video performance.

No Drivers or Software Required

This universal active adapter utilizes integrated or dedicated GPUs, enabling high-performance video with minimal CPU usage. It requires no drivers or software and works with any HDMI-enabled laptop, desktop, Ultrabook, MacBook, or Chromebook. It is compatible with any operating system, including Windows, macOS, Ubuntu, and ChromeOS.

Extended Cables

This HDMI to DP adapter features a 1ft (30cm) cable between the HDMI and DP connectors, reducing strain on ports and connectors. The adapter includes a 1.6-foot (50cm) USB power cable for connecting to a powered USB port anywhere on the laptop or to a USB wall charger. Power is required for the adapter to function.
