Our multi-camera video conferencing solution shows a 360-degree view of the room and uses AI to intelligently auto-focus on in-room participants and switch between cameras for a more natural hybrid meeting experience. This bundle works for small to large conference rooms, capturing the best perspective of the room for more effective hybrid collaboration. Bundle includes the Meeting Owl 4+ and Owl Bar.

Cover every angle of the meeting room from two different perspectives - the front of the room and the center of the table.
Intelligently determines where speakers are seated and looking and switches between cameras to show the best angle for face-to-face conversations.
4K 360-degree super-fisheye Meeting Owl lens and 4K Owl Bar camera ensure crisp video from every angle.
