Secure a laptop, docking station, or other peripherals with this 3-in-1 serialized combination cable lock

The Universal Laptop Lock is a versatile solution compatible with Noble Wedge®; K-Slot (T-Bar), or Nano, providing flexibility and convenience.

Adaptable Security

A unique on-the-fly lock tip mechanism allows to quickly adapt the lock tip to different security slots. Simply rotate the lock selection dial to change the shape of the lock tip to match the security slot, all without the need to carry different lock tips or use special tools. The cut-resistant steel security cable is 6.6ft (2m) long and 0.17in (4.4mm) thick, providing reach and durability.

Serialized Combination Lock

The lock comes with its own pre-set combination code for streamlined security management for IT administrators. The lock can withstand a pull force of 202lb (91.6kg) for K-slot, 164.4lb (74.6kg) for Nano, and 110.2lb (50kg) for Noble Wedge®; ensuring your computer or other devices remains safe from theft.

Note: The pull force values mentioned may vary if the security slots do not comply with the design standards specified by their respective manufacturers.

Widely Compatible

The versatile security lock is not limited to laptops or notebooks only. Use this lock to secure other devices such as docking stations, monitors, printers, SFF computers, projectors, oscilloscopes, or other office and lab equipment, expanding its utility. The lock is future-proof as it works with previous and newer computers from various brands, including HP, Dell, Microsoft, and more. Different thickness spacers are provided to ensure a better fit for your device.

Full-Motion Lock Design
