cable by providing an end-to-end solution for connecting your digital HDMI computer to your VGA monitor or projector.

Unlike most HDMI to VGA adapters which require a power outlet to convert the video signal, the HD2VGAMM6 doesn’t need external power in most installations. To work with Mac computers where extra power is needed, the HD2VGAMM6 features an optional integrated USB power source (USB cable not included), which makes connecting a display to your desktop or workstation that much easier, if additional power is required.

In the past, converting digital HDMI to analog VGA was a difficult and expensive task. Now, you can avoid upgrade costs by connecting your HDMI video source to your existing VGA monitor or projector using the HD2VGAMM6. Plus, because the adapter cable supports video resolutions up to 1920x1200 or 1080p, you can rest assured you can use your existing VGA display while maintaining high-definition video quality.

The HD2VGAMM6 converter cable delivers a precise 6ft connection that eliminates the clutter of excess cable length and ensures a tidy, professional installation. For longer shorter installations, we offer a 3 ft HDMI to VGA cable (HD2VGAMM3), and longer installations we offer a 10 ft HDMI to VGA cable (HD2VGAMM10), enabling you to choose the right cable length for your installation needs.

Please note: Digitally encrypted content from the HDMI video source will not be displayed.

The HD2VGAMM6 is backed by a 3-year StarTech.com warranty and free lifetime technical support.
