

ICY BOX IB- DK2252AC Wired USB 3.2 Gen 1 (3.1 Gen 1) Type-C Black

Model: IB-DK2252AC

Manufacturer: ICY BOX

EAN: 4250078171331

Product Code: 638472

R4,768

The more, the better!

A Docking Station with a variety of connections is a real added value for a notebook that, after using the charging port, may only have one more port left for further applications. With the IB-DK2252AC you can, for example, connect a mouse, a full-size keyboard, you can connect one or more larger external displays, connect external hard drives or a printer via USB ports and also enjoy stable internet via the Ethernet port.

With one foot firmly on the ground

ICY BOX has a wide variety of dock designs in its portfolio: flat, horizontally lying models, those that are placed under a notebook in a wedge shape for ergonomic working or those that are equipped with a stand like this IB-DK2252AC. The stand gives the device a secure hold - even when plugging in and unplugging cables - and in this case enables the upright Docking Station to have effective cooling

qualities!

Convective heat dissipation

This DockingStation model is designed for vertical positioning with the help of a stand. Both enclosure surfaces have ventilation slots that allow convective heat dissipation during operation: The heat generated during operation is dissipated at the top, while cooler air is drawn in from below through the vents and cools the enclosure, and as a result the heated air escapes again through the top vents.
