A Whole Home WiFi Solution

Nothing's worse than unreliable connections and internet speeds unable to keep up with your digital lifestyle. Halo works as a unified system to guarantee a strong WiFi signal in every corner of your home, providing an incredibly fast and stable network experience. Interruption and buffering will be a thing of the past.

Smooth Streaming in Every Corner

Average routers are designed to send WiFi in all directions but don't always reach every room. There are always "dead spots" where your connection fades away or suddenly drops without warning. A better solution is to customize your WiFi to fit your house, letting the WiFi grow as your needs change. Halo H30G works as a unified system to fit any house type, delivering a fast and stable WiFi signal throughout your home. So go ahead, listen to music as you cook, stream a movie while relaxing in bed, or video chat with a loved one on the porch—Halo keeps you connected across your entire home.

Signals Never Drop with Seamless Roaming

The Halo system automatically connects your phones or tablets to the fastest node, delivering a truly seamless network experience. No more sudden signal drops or lagging WiFi when you're walking around the house.

Powerful Signal Amplifiers

Strong WiFi Signals Throughout Your Home

Adopting the well-designed signal amplifiers and receivers, Halo H30G effectively amplifies signal transmission power and captures signal more rapidly, greatly improving the distance of signal transmission and the signal strength of each of your WiFi devices.

Fast Dual Band WiFi up to 1.3 Gbps

Every unit of Halo WiFi System offers fast speed dual band WiFi, delivering combined speeds of up to 1.3 Gbps. Whether you're bingeing HD movies, downloading entire libraries of data, or gaming online, Halo's boosted WiFi speeds fulfill your devices' needs.

Connect up to 100 Devices

Halo H30G harnesses the power of two separate AC1300 units, delivering super fast seamless WiFi

for up to 100 devices. Featuring MU-MIMO technology, Halo keeps your phones, computers, and all IoT devices connected simultaneously and operating at peak performance.

Beamforming for Targeted Signals

Halo H30G supports Beamforming technology to detect devices, even if they are far-away or low-powered, and concentrate wireless signal strength towards them, making your connection more stable.

Better Online Experience with Self-Healing

The Halo system smartly chooses the better route of connection between Halos according to the status of the network. If one Halo has an issue, the system will automatically reroute data to fill in any gaps in coverage to make sure you always stay online stably.

Gigabit Ports, WAN/LAN Auto-Sensing

No need to distinguish LAN/WAN ports with WAN/LAN Auto-Sensing technology, reducing time and effort. Halo H30G makes full use of your ISP internet access and transfers data to wired devices at lightning fast speeds for peak performance with full gigabit ports which are 10× faster than Ethernet ports.

MERCUSYS App Helps You Set Up in Minutes

Without understanding technical knowledge or reading installation instructions in advance, just follow the on-screen directions with the MERCUSYS app to set up your mesh network in minutes.

Powerful Parental Controls

Easily manage your kids' online time and contents to create a healthy online environment for the development of minors

Manage and Secure Your Home Network

The MERCUSYS app helps you manage your WiFi anywhere you are through your iOS or Android devices.

Check the Status of Connected Devices

Intuitively view the working status of each Halo network and see what devices are connected, prioritize or block the devices if needed.

Quality of Services

Prioritizes devices you select to perform better.

Set Up a Guest Network

Provides a separate network for guests to ensure your security and privacy.

Monthly Reports

See a comprehensive list of your network details every month, including usage, blocked content, security threats and more.

Shake to Share

Shake to share your home WiFi's name and password to invite your friends to join the network.

New Device Access Alert

The MERCUSYS App proactively sends out an alert to inform you when an unfamiliar device is connected. Tap to block the device if it has a security risk.

- One Unified Network – With advanced Mesh Technology, Halo units work together to form a single unified whole home network with one WiFi name and password
- Seamless Roaming – Automatically switch between Halos as you move around your home, always getting the best signal to enjoy the fastest connections for all your devices
- Whole Home Coverage – Blanket up to 3,500 ft² (320 m²) with high-speed WiFi, eliminating WiFi dead zones at your home
- 1.3 Gbps Dual Band WiFi – Halo H30G provides fast and stable connections up to 100 devices with speeds of up to 1,300 Mbps and works with major internet service providers (ISPs) and modems
- Easy App Control – Use the MERCUSYS App to quickly set up and manage your WiFi
- Full Gigabit Ports – 2× Gigabit ports per Halo unit for lightning-fast wired connections

Summary: Mercusys AC1300 Whole Home Mesh Wi-Fi System. Product colour: White, Antenna type: Internal. Wi-Fi band: Dual-band (2.4 GHz / 5 GHz), Top Wi-Fi standard: Wi-Fi 5 (802.11ac), Wi-Fi
