

Celly SMARTFINDERBK GPS tracker/finder Black

Model: SMARTFINDERBK

Manufacturer: CELLY

EAN: 8021735200901

Product Code: 644055

R1,148

PERSONAL OBJECTS TRACKER

SMARTFINDER is the Celly tracker compatible with iOS devices that allows you to locate your valuables wherever they are. Thanks to its compact and light design and the comfortable nylon lacet, SMARTFINDER can be fixed to keys, glasses, purses, wallets and all everyday objects in order to constantly monitor their position. Using 'FindMy' app (available only on iOS devices), it will always be possible to check the exact position of the object directly from your smartphone, tablet or smartwatch. To connect devices and tracker to each other, just press and hold the button on the tracker. The tracking of connected objects can take place in two ways: through an acoustic signal emitted by the tracker or through the location of them on the application map. To work, SMARTFINDER uses a small lithium battery that can be easily replaced. Its wide applicability and small size make it usable in different situations, guaranteeing the detection of the object to which it is hooked to.
