emissions, kg: 1140 | Manufacturer's estimate: Product life cycle used in emission assessments, years: 6 | Short summary:

This 49" curved Dual QHD 5K multitasking display maximizes your productivity. Stunning color reproduction (100% sRGB, 98% DCI-P3, 98% P3) with excellent viewing angles (178/178) and versatile connectivity ensure that you can tackle any task effortlessly. The built-in Comfort View Plus filters harmful blue light for your eyes, ensuring endurance through long workdays.

USB-C enables simultaneous charging of your laptop (up to 90W) while displaying your computer's image on the screen. With the new power delivery feature, you can charge your laptop even if the display is turned off and conveniently connect all peripherals to the screen's USB hub. The display also features an Ethernet port supporting management features such as PXE, Wake-on-LAN, and MAC Address pass-through.

Connect two computers to one display and share the screen with Picture-by-Picture (PbP) or Picture-in-Picture (PiP) functions. The automatic KVM (keyboard, video, and mouse) function allows control of two computers with a single keyboard and mouse, automatically switching to the last connected device. The U4924DW can be split into two physical displays connected to one computer (iMST) without the need for separate software.

Navigation through menus is made easy with the hidden joystick controller at the back of the screen. The stand is extensively adjustable, and the display can alternatively be mounted using VESA-compatible mounts and stands.
