Freewell filter and lens set for DJI Osmo Pocket 3

The set includes macro, wide-angle and anamorphic lenses, as well as ND 8/32/128 filters, which will give your shots a unique touch. What's more, they were created from high-quality materials and are resistant to scratches, dust and greasy stains. In addition, their installation and removal will not cause you any problems.

Cinematic quality

Discover a new level of creativity with the Freewell kit, which includes a 40mm macro lens and a 0.9x wide-angle lens, specially designed for the DJI Osmo Pocket 3. With the 1.1x anamorphic lens, you can give your videos a cinematic look, achieving the aspect ratio and lens flare typical of film productions. This is the perfect tool for filmmakers who want to bring a cinema-like atmosphere to

their projects.

ND filter set

High-quality ND filters (ND8, ND32, ND128) guarantee excellent results in various lighting conditions. They effectively control the amount of light entering the lens, preventing overexposure.

Innovative design

The unique detachable design of the wide-angle lens, which transforms into a macro lens, allows you to capture exceptional shots full of detail. This allows you to explore both wide perspectives and microscopic elements without having to change equipment.

Easy to use

The lens and filter kit is designed with simplicity and efficiency in mind. It is ideal for both professionals and hobbyists who want to enhance the quality of their materials. Plus, it guarantees ease of use and quick installation, allowing you to focus on creating amazing content.
