FREEWELL filter set for DJI Mavic 4 Pro All Day (8pcs)

The Freewell All Day filter set is a practical solution for those who want to have full control over exposure when recording with the DJI Mavic 4 Pro drone, including at different focal lengths and apertures. The set includes ND (from ND4 to ND64) and hybrid ND/PL filters ranging from ND8/4 to ND64/32, allowing you to fine-tune your settings for varying lighting conditions throughout the day - from bright sunshine to cloudy skies.

High quality shots

The filters combine a light-dimming function with polarization to reduce glare from water, glass or other reflective surfaces. As a result, recordings gain better contrast, color saturation and greater depth. What's more, with Split ND and ND/PL, you can fully control exposure in all lighting conditions.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
