

LANBERG patch panel 24 port 1U cat.6A UTP black with cable organizer

Model: PPUA-1124-S

Manufacturer: LANBERG

EAN: 5901969441932

Product Code: 653175

R1,147

The Lanberg patch panel provides an efficient solution for managing network connections in a structured cabling system. With 24 ports, this patch panel is designed for CAT 6a applications, offering reliable performance through unshielded twisted pair (UTP) technology. The steel construction ensures durability, while numbered ports simplify organization and maintenance for network professionals. This rack-mountable panel is compatible with standard 19-inch racks and is equipped with a mounting kit and cable manager for streamlined installation. Operating within a temperature range of -10°C to 60°C, the panel can withstand various environmental conditions, making it suitable for diverse setups. The LSA and IDC termination types increase flexibility, and the use of 26-20 AWG maintains high-quality signal transmission, ensuring a robust connection across all ports. The combination of features and solid construction makes the Lanberg patch panel a reliable choice for any professional networking space.
