Neewer softbox 85 cm

The Neewer Hexadecagon softbox with a diameter of 85 cm is a tool for photographers who want perfect soft light, ideal for portraits, product shots, fashion and other styles of photography. The deep parabolic design with internal silver coating disperses light evenly, maintaining a neutral color rendering index (CRI) and temperature, resulting in a natural look for your subjects. With two layers of diffusers, you can effectively soften the light and eliminate unwanted shadows.

Quick installation and durable construction

Thanks to its 16 sturdy ribs, the softbox provides unparalleled durability and a perfect parabola shape that won't deform even after years of heavy use. The quick unfold mechanism allows the softbox to fully unfold in less than 15 seconds, without the need for tools. When folded, it weighs only 1.5 kg, making it easy to store and transport in the included bag.

Modifiable grid and diffusers for even better light control

The Neewer softbox features a honeycomb grid that focuses light at a 45° angle, allowing for dramatic lighting effects that perfectly highlight the model's facial structure. It also comes with two high-quality diffusers that can be freely combined to achieve the desired lighting effect.

Compatible with Bowens mount

Thanks to the Bowens mount, this softbox is compatible with a wide range of studio and continuous lights such as NEEWER, Godox, Aputure, and other LED and flash lights, making it a versatile solution for a variety of photographic applications.

Easy storage and transportation

The kit comes with a large carrying bag, equipped with an internal mesh pocket, which allows for convenient storage of the softbox itself, as well as the grid and diffusers. This makes the softbox easy to carry and ideal for outdoor work.

Included

- Softbox
- Diffuser x 2
- Grid x 1
- Carrying bag x 1
