

LANBERG PLU- 6000 Plug RJ-45 UTP CAT6 8P8C 100PCS

Model: PLU-6000

Manufacturer: LANBERG

EAN: 5901969415773

Product Code: 653402

R751

Set pcs of shielded RJ-45 [8P8C] Cat.5 network plugs, intended mainly for UTP LAN cables. Additionally, in the set, each plug has a guide/gib that facilitates the correct positioning of the cable before terminating it. Due to the use of triple teeth (3 prongs), Lanberg connectors fit both types of Ethernet cables - solid and stranded. The solid consists of one piece of metal wire (used for long-distance, structural installations). The stranded consists of a bundle of thinner wires (such as patch cords, short-distance application).
