

LANBERG power strip 1m 5 sockets for UPS system

Model: PS0-05E-0100-IEC-BK

Manufacturer: LANBERG

EAN: 5901969419511

Product Code: 653497

R625

UPS solutions are the true heroes of homes or apartments in situations of power outages. Lanberg has introduced a complementary product to the offer, which save many devices from turning off as a result of power outage.

Using the power strip' input plug - IEC 320 C14 - you can connect this device directly to the UPS output sockets, which effectively protect the electronic equipment connected to the extender in your home/company.

This series of power strips offer 4 or 5 French (CEE 7/5) sockets, which will be backed up by UPS batteries during the critical moments/unexpected blackout.
