

Flytec V700 12,000 mAh bait boat

Model: V700 12000mah

Manufacturer: FLYTEC

EAN: 5907085523941

Product Code: 654499

R3,163

Flytec V700 12000mAh Bait Boat

The Flytec V700 allows you to cast bait up to 500 m, ensuring a reliable connection to the remote control via a high-frequency signal. The fixed-speed cruise function lets you maintain a steady course without constantly operating the joysticks, giving you more freedom while fishing.

Dual hoppers and high capacity

The boat is equipped with two independently controlled hoppers with a total capacity of 1.5 kg, allowing for precise bait dispensing or mixing different types of bait. The electromagnetic hoppers open quietly without scaring the fish, and the sturdy handle makes it easy to carry the boat with one hand.

Powerful propulsion and automatic course correction

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Two motors with efficient three-blade propellers guarantee high power and stability in challenging conditions. The built-in gyroscope automatically corrects the course, ensuring the boat maintains a straight path even in crosswinds or waves.

High-capacity battery and power level monitoring

The 7.4V 5200 mAh battery ensures long runtime, and a clear LED indicator shows the charge level. When the battery is nearly depleted, warning lights begin to flash and the remote control emits an audible signal—giving you time to safely bring the boat ashore.

Water and impact resistance

The durable ABS construction is resistant to shocks and collisions, and the sealed hull protects the electronics from water. The boat also handles rain and winds up to force 5, so you can use it in virtually any conditions.

Lighting and visibility in all conditions

Thanks to white and red navigation lights, you can easily spot the boat from a distance, even after dark or in fog. The built-in spotlight facilitates precise steering at night and enhances safety on the water.

Lightweight and comfortable remote control

The remote control weighs less than 200 g, features an ergonomic grip, and a clear LCD screen where you can check the battery status of both the boat and the transmitter. This gives you full control over the device, allowing you to focus on fishing rather than operating the equipment.

Included

- Bait boat
- Remote control
- Remote control lanyard
- Lithium battery
