

HP 725 Multi-Device Rechargeable Wireless Keyboard (EN)

Model: 9T5B2AA#ABB

Manufacturer: HP INC.

EAN: 198122141197

Product Code: 654691

R1,958

The HP 725 is a versatile wireless keyboard designed to enhance productivity while providing ease of use. With its multi-device compatibility, users can seamlessly switch between their PC, tablet, and other devices, making it suitable for both home and office environments. The full-size QWERTY layout and numeric keypad ensure a comfortable typing experience, while the adjustable height feature allows for personalized ergonomics. The keyboard is rechargeable, powered by a supercapacitor, enabling users to enjoy extended usage without frequent charging interruptions. Equipped with a USB wireless receiver and Bluetooth technology, the HP 725 offers a reliable operating distance of up to 10 m, granting freedom of movement and versatility in any workspace. Its spill-resistant design adds an extra layer of durability, protecting against accidental spills. The inclusion of dedicated keys for calculator functions, dictation, PC lock, and Copilot further amplifies its productivity features, making it a valuable addition to any setup.
