TurboWash™ 360

Your laundry can be thoroughly cleaned in just 39 minutes without compromising fabric protection. Thanks to the 3D multi-nozzles that shoot water in four directions, every inch of your laundry gets washed. The Inverter Pump changes the power of the water sprayed, depending on the level of clean needed. By maximizing the dynamic between spray power, detergent, and cycle motion, the LG

washer reduces laundry time to just 39 minutes, saving energy by 28%, and reducing clothing damage by 14%.

Steam™

LG Steam™ loosens allergens found in fabrics, which are then drained out during the rinse and spin cycles, reducing allergens on your clothing and bedding.

AI Wash™

The “AI Wash” cycle is a dedicated separate cycle to enable customized washing using the best motion and stroke depending on the fabric. The Customized Wash Motion will help prevent fabric damage whilst maintaining washing power.

AI Direct Drive™

Users can experience the ultimate in fabric care with our AI Inverter DirectDrive™ technology, enhanced by deep-learning AI to analyze wash patterns from big data, classify fabrics into softness levels, and provide 6Motions through precise motor control, ensuring maximized clothes protection to keep them lasting longer.

ThinQ™ WiFi

With LG ThinQ™ technology, you can launder brilliantly, from operating your laundry remotely to downloading additional cycle settings. Interact with your washing machine and access the latest innovations, including Google Assistant.
